MADiE 1.1.9 Release Notes

The following updates are included in the MADiE 1.1.9 release:

Category	Feature Description
Test Case Export	**QI-Core measures:** MADiE has been updated to support export of QI-Core test cases in a downloadable .zip file. The .zip file will include the JSON file(s) as well as a ReadMe file that maps the PatientID (UUID) to the Test Case Title and Test Case Group. Users may either export the test case JSON for a single test case or for all test cases from the test case list page. • **Exporting a single test case**: An 'Export' option has been added to the 'Actions' drop down in the test case table. • **Exporting all test cases**: Select the 'Export Test Cases' on the test case list page.
Measure Export	MADiE has been updated so that Denominator Exception is the last population listed in the Human Readable, reflecting the order of measure calculations. The populations are now listed in the following order: • Initial Population • Denominator • Denominator Exclusion • Numerator • Numerator Exclusion • Denominator Exception BONNIEMAT-1473
Population Criteria	**QI-Core Measures:** MADiE has been updated to allow the Improvement Notation criteria / values to be de-selected
CQL Value / Validations	MADiE has been updated to validate CQL 'Using' statements. • **CQL that includes 'Using' statements:** When the model and version in the 'Using' statement does not match the model and version selected during measure creation the "Using" statement will now automatically correct when the CQL is saved. A message will be provided to notify the user of this update. • **CQL that do not include 'Using' statements:** When the CQL does not include a 'Using' statement, the user will be provided with a message indicating the CQL is missing a 'Using' statement and asking the user the model and version to the CQL.
Measure Versioning	**QI-Core Measures:** MADiE has been updated to allow a measure to be versioned when one or more test cases are Invalid. A Test Case is considered Invalid if the JSON contains errors. BONNIEMAT-1503
Resolved Known Issues	BONNIEMAT-1487 After transferring ownership of a library, the new owner was not able to create a draft or edit the library.
