MADiE 1.2.1 Release Notes

The following update is included in the MADiE 1.2.1 release:

Category	Feature Description
Measure Creation	Removed the "Review Info" tab
Measure Creation	**QI-Core Measures:** The following updates have been made: • Supplemental Data Elements (SDE) have been updated to have one description per measure instead of one description per SDE. • Risk Adjustment Variable (RAV) s been updated to have one description per measure instead of one description per RAV. • Measures that included more than one description per SDE and/or RAV have been updated to combine the descriptions into a single SDE and/or RAV description.
Measure Export	**QI-Core Measures:** Rate Aggregation has been added to the measure bundle and human readable export. (BONNIEMAT-1630)
Test Case Creation	**QDM Measures:** MADiE has been updated to add the following functionality: • Users can edit elements in the element grid on the test case edit screen • Users can delete all test cases associated with a QDM measure • Users can transfer test cases from Bonnie QDM to MADiE
Test Case Execution	**QDM Measures:** MADiE has been updated to display the measure CQL statements on the coverage tab after clicking 'Run Test(s).' Note: Code coverage percentages and highlighting will not calculate/display at this time.

Resolved Known Issues	**Date Added:** 11/15/23
	QDM Measures: When a complex attribute was added to a QDM test case, the ID was initially retained when adding subsequent attributes.
	
	Date Added: 11/15/23
	QDM Measures: When the 'Related To' attribute was selected on the Attributes tab for a QDM test case, it would display a null value rather than the attribute added.
	
	Date Added: 11/21/23 BONNIEMAT-1672
	QI-Core Measures: Users that were importing QI-Core test cases from a MADiE Export File to **create new test cases** were seeing the following unexpected behavior:
	• Users were unable to switch between the listed populations when clicking on the populations on the Highlighting Tab
	  1. Highlighted CQL would not display
	  2. Population results would not display
	• On the Expected/Actual tab, Users were unable to make changes to Expected Results for Patient Based Criteria.

MADiE 1.2.1 Release Notes

Category	Feature Description
	• **Note**: Observations and stratifications are not currently transferred to new test case. Test cases that include observations or stratifications will not have expected values imported.
