

MADiE 1.4.1 Release Notes

The following updates are included in the MADiE 1.4.1 release:

Category	Feature Description
Measure Export	<p>QDM Measures: The following updates have been made to the human readable export file:</p> <ul style="list-style-type: none"> • The data criteria section and the definitions section has been updated to display alphabetically. (BONNIEMAT-1868 BONNIEMAT-1885) • The population criteria stratification section now displays "None" if there is no stratification description entered for the measure. (BONNIEMAT-1867) • The stratification sections now display an incremental number in each stratification label for measure containing multiple stratifications. (BONNIEMAT-1883) • The following labels in the population criteria section now appear plural instead of singular: (BONNIEMAT-1866) <ul style="list-style-type: none"> ○ Denominator Exclusions ○ Numerator Exclusions ○ Denominator Exceptions ○ Measure Population Exclusions
Measure Creation	<p>QDM Measures: Users again have the ability to version measures. With this function being available again users no longer have the ability to re-transfer QDM measures from MAT to MADiE.</p> <ul style="list-style-type: none"> • After the MADiE 1.4.1 release, QDM measures may be transferred from the MAT to MADiE one time (Note: this may be either an initial transfer or a retransfer from the MAT to MADiE.) • This would be the final transfer-users would not be able to transfer the measure from the MAT to MADiE a second time after the MADiE 1.4.1 release. <p>IMPORTANT NOTE:</p> <ul style="list-style-type: none"> • If a measure is versioned in MADiE after the MADiE 1.4.1 release prior to completing that one final transfer from the MAT to MADiE, that measure may NOT be transferred from the MAT to MADiE one final time as noted above.
Resolved Known Issues	<p>Date Added: 5/8/2024 BONNIEMAT-1857</p> <p>QI-Core Measures: When making edits on the Details tab, Name, Version & ID sub-tab, if the Measure CQL Library Name exceeds 64 characters the 'Save' button is disabled and updates cannot be made to the page.</p> <p>Work around: Edit the Measure CQL Library Name to not exceed 64 characters and save.</p>

MADiE 1.4.1 Release Notes

Users were able to export a measure containing an invalid CQL Library Name. ([BONNIEMAT-1857](#))

QDM Measures: Stratification descriptions can't be added to measures that were transferred from the MAT. ([BONNIEMAT-1894](#))

QI-Core Measures: The criteriaReference ID contains a null value instead of containing the measurePopulation ID, affecting the Measure Observations expected and actual values. ([BONNIEMAT-1890](#))
