

MADiE 2.0.1 Release Notes

The following updates are included in the MADiE 2.0.1 release:

Category	Feature Description
Measure Creation	QDM Measures: MADiE now supports the ability for users to search, filter and apply codes and value sets into their CQL directly (without having to access VSAC outside of MADiE in order to look up the code or value set).
Measure Export	QDM Measures: The Measure Type field has been updated to adhere to the latest THO (https://terminology.hl7.org/ValueSet-v3-ObservationMeasureType.html) in both the UI in MADiE as well as the measure exports. (BONNIEMAT-1927 , BONNIEMAT-1928)
Measure Export	QDM Measures: Measure exports are updated to display the following: <ul style="list-style-type: none">• Endorsed By field: Display "None" when the user makes no selection.• CBE Number field: Display "Not Applicable" when the user makes no selection for the Endorsed By field. (BONNIEMAT-1931)
Test Case Export	QDM Measures: The QRDA Summary file is now included in the QRDA Test Case Export. (BONNIEMAT-1659)
Test Case Export	QDM Measures: The human readable export now supports displaying special characters. (BONNIEMAT-1869)
Test Case Execution	QI-Core Measures: MADiE has been updated to use FQM-Execution Engine 1.4.1. Release notes can be found here .
Test Case Execution	QDM Measures: MADiE has been updated to use CQM-Execution Engine 4.2.0. Release notes can be found here .
Resolved Known Issues	Date Added: 6/4/2024 QDM Measures: The QRDA export for test cases does not unzip in Windows systems using the native Windows unzip program. (BONNIEMAT-1917) QDM Measures: In some cases, the QRDA test case export would fail, with minimal feedback. (BONNIEMAT-1967) QDM Measures: The measure export process was optimized to prevent exports from taking several minutes to complete, resulting in exports timing out and failing to complete. (BONNIEMAT-1944)
