

MADiE 2.0.3 Release Notes

The following updates are included in the MADiE 2.0.3 release:

Category	Feature Description
Measure Creation Measure Export	QDM Measures: Two of the Measure Type field options have been updated in both the user interface as well as in the export: <ul style="list-style-type: none">• "Intermediate Clinical Outcome Measure" has been changed to "Intermediate Outcome Measure"• "Patient Reported Outcome Performance Measure" has been changed to "Patient Reported Outcome Measure Type" (MADIE-2005)
Test Case Execution	QI-Core Measures: When re-importing test cases that were previously exported from MADiE, users may receive a warning message with information about import issues. Users now have the ability to click an icon and copy the warning message to their clipboard to be pasted into any text editor to review as they continue to work in MADiE.
Test Case Execution	QDM Measures: Test case CQL highlighting has been updated to add a single underline along with green highlighting for passing test cases and a double underline along with red highlighting for failing test cases.
Test Case Export	QDM Measures: Some test cases were unable to be exported in QRDA format due to a parsing error in MADiE. (MADIE-1987)
Resolved Known Issues	Date Added: 6/26/2024 QDM Measures: Users may be unable to save changes to a test case element when attempting to delete the values entered in DateTime fields. (MADIE-1973)
