MADiE 2.0.8 Release Notes

The following updates are included in the MADiE 2.0.8 release:

Category	Feature Description
Measure Creation	The following updates were made to the CQL Editor tab: • A new Parameters tab has been added to the CQL Editor that provides users with a user interface to build parameter statements to be placed into the measure CQL. • The Definitions tab now supports definition comments in the CQL expression builder.
Measure Creation	The UI has been updated to replace the Delete Measure button in the measure header with an action center which now allows a user to delete the measure, export the measure, and version or draft the measure based on the user's access. This allows users to complete these actions without having to navigate back out to the measure list. (MADIE-1888)
Measure Creation	**QI-Core Measures:** MADiE has been updated to use CQL-ELM Translator 3.18.0. More information can be found here.
Test Case Execution	MADiE has been updated to use FQM-Execution Engine 1.6.0. Release notes can be found here.
Measure Export	MADiE has been updated to use LiquidBase Templates 0.4.6 based on QMIG profiles. More information can be found here.
Resolved Known Issues	Population basis is not displayed in human readable exports (MADIE-2042) Some users were unable to run test cases on QI-Core test cases (MADIE-2078)
