

MADiE 2.1.4 Release Notes

The following updates are included in the MADiE 2.1.4 release:

Category	Feature Description
Measure Creation	QI-Core Measures: Users are now able to specify a Scoring precision at a population criteria level. This field has also been added to measure exports.
Measure Creation	QI-Core Measures: Users are now able to specify an Intended Venue of either Eligible Clinician (EC) or Eligible Hospital (EH). This field has also been added to measure exports.
Test Case Creation	Users are now able to copy test cases from one measure to another measure within the same model and model version to which they have edit access.
Measure Creation	Users are now able to view the human readable file for any measure that does not contain errors within MADiE without having to export the measure and view it outside of MADiE.
Resolved Known Issues	Users were able to create multiple drafts of a measure when they click on the “Continue” button more than once while MADiE is processing the request. (MADiE-2120)
